

Proposed Telecommunication Tower

490 Greenleaf Drive

Over the past three months, the Village has been talking with T-Mobile regarding the installation of a telecommunication tower on the Public Works campus, 490 Greenleaf Drive. The tower will be similar to the one at the Village Hall and will be 120 feet in height. There will be locations for 3 cell providers and microwave facilities for Village communications. The microwave facilities would be a cost effective solution for the transferring of large data files between Village buildings and monitoring of live video by the Police Department.

The tower would be located within an alcove on the west side of the building. T-mobile will place their antenna at the 120 foot elevation of the tower and The Village will place a microwave antenna at the 100 foot elevation. Equipment will be located at the base of the tower within a screened enclosure. The tower will be designed to accommodate two additional cell providers should there be interest from other companies.

A copy of the site plan and elevation drawings is available for review in the village hall.
