## WEATHER ALERT SIRENS

An Emergency Outdoor Warning Siren System is an all-hazards siren system used to warn the general population of potential danger. During an emergency, the sirens may be activated for a set amount of time as determined by your community. *Keep in mind, the sirens are loud, and although you might be hearing the sirens, they might not be coming from Vernon Hills, where the sirens could be coming from a neighboring town or county.*

### WHAT DO THE SIRENS MEAN?

*Most systems use two siren tones.*

- **Alert:** A single tone signifying an emergency alert. This signal may be used to inform the community of an emergency or disaster, including a severe storm, tornado warning (not a tornado watch), earthquake, chemical hazard/hazardous material incident, extreme winds, or biological hazard.
- **Attack:** An up-and-down, rising and falling tone to signify there is a homeland security or attack emergency.
- **All Clear:** Many communities do not use an All Clear signal. Tune in to your local news for notification from city officials.

**SIREN TEST TIMES** - Sirens are tested on the first Tuesday of each month at 10 a.m.

### WHAT SHOULD I DO IF I HEAR THE SIRENS?

If the sirens are activated and it is not a monthly siren test, the public should see it as a signal to:

- Seek shelter.
- Tune in to radio or television to get information about a type of emergency and instructions and recommendations.
- Listen to your local media for indications that the emergency is over.

***The public should not call 9-1-1 unless they have an actual emergency.***

### WHAT DO THE SIREN SIGNALS SOUND LIKE?

[Alert \[MP3, 292KB, 1:00 - 1 min\]](#)

[Attack \[MP3, 295KB, 1:00 - 1 min\]](#)

*Note:* Audio files are produced in MP3 format. Use Media Player.

You can also look under **NOAA.GOV** or [HERE](#) for Vernon Hills weather and alerts.

You can contact the Vernon Hills non-emergency police to inquire at **847-362-4449**.
